## 2. 對話學習實用句型 (10 個)

Yes, it's quite possible that we'll see people going on vacations in space within our lifetime. 是的，我們很有可能在有生之年看到人們去太空度假。

Humans are naturally curious, and space represents the ultimate frontier for adventure. 人類天生好奇，而太空代表著冒險的終極前線。

It is possible that people will vacation on other planets in the future, but it is unlikely to happen within our generation. 未來人們有可能去其他星球度假，但這在我們這一代不太可能實現。

The moon is seen as the next major target. NASA, SpaceX, and others are planning crewed missions and potential bases in the next decade. 月球被視為下一個主要目標。美國國家航空暨太空總署 (NASA)、SpaceX 和其他公司正在規劃未來十年的載人任務和潛在基地。

Being confined in tight space, isolated from Earth, and facing the unknown can lead to anxiety our feelings of loneliness. 被限制在狹小的空間中，與地球隔絕，面對未知，會導致焦慮和孤獨感。

Yes, I would love to travel into space if given the opportunities. 是的，如果有機會，我很想去太空旅行。

It may take 20 to 50 years before space travel become affordable for regular people. 一般人可能還需要 20 到 50 年的時間才能負擔得起太空旅行的費用。

I'd be interested in trying it for a while, maybe living at a Mars-based or lunar colony. 我有興趣嘗試一段時間，也許住在火星或月球殖民地。

Space is full of mystery and new things to explore. That makes it the perfect place for curious people. 太空充滿了神秘和值得探索的新事物。這使得它成為好奇人士的完美之地。

Technology is improving, but long trips to planets like Mars are still too risky and costly for vacations now. 技術不斷進步，但前往火星等行星的長途旅行對於度假來說仍然過於危險且成本過高。

## 3. 學習心得

今天的口說練習 AI 幫助了我許多，例如許多回答都非常具有學習意義。
